COUNTY POPULATION PASSES 8,000,000

The population of Los Angeles County, continuing to climb, reached an estimated total of 8,074,000 at the beginning of the year. This is an estimated gain of 597,000 or 8.0% since the 1980 Census. This increase contrasts sharply with the stagnation of the early Seventies, a decade during which the County's population rose from a 1970 total of 7,041,980 to a 1980 figure of 7,477,421, a gain of 445,000 or 6.3%.

A review of the traditional indicators of population change shows that 80% of the County's growth this decade is the result of net natural increase, a surplus of births over deaths. Although the County Department of Health Services has not yet released their 1985 birth and death figures by race and ethnicity, a projection of the 1980-1984 trends to the beginning of 1986 shows that Hispanics accounted for 70% of the total net natural increase, Blacks 15.4%, Asians 10%, Non-Hispanic Whites 0.4% and all others 4.2%.

Vital records for the years 1980 through 1984 reveal that of the slightly more than 690,000 total births during the first half of the decade, 309,000 or 44.8% were to Hispanics, 219,000 or 31.8% to Non-Hispanic Whites, 97,300 or 14.1% to Blacks, 46,700 or 6.8% to Asians and 17,800 or 2.6% to all others. However, in these years the County's 294,000 deaths are distributed quite differently. Approximately 218,000 or 74% of all deaths were Non-Hispanic Whites, 12.4% Blacks, 10.5% Hispanics, 2.7% Asians and 0.4% all others.

Los Angeles County
NET NATURAL INCREASE BY RACE AND ETHNICITY
1980 Through 1984

NET NATURAL	Total	Non-Hispanic White	Hispanic	Black	Asian	Other
INCREASE	*395,995*	*1,408*	*278,375*	*60,776*	*38,762*	*16,674*
Percent of Total	100.0	0.4	70.3	15.3	9.8	4.2
BIRTHS	*690,643*	*219,377*	*309,327*	*97,355*	*46,741*	*17,843*
Percent of Total	100.0	31.8	44.8	14.1	6.7	2.6

Percent of Total	100.0	74.1	10.5	12.4	2.7	0.3

Source: Los Angeles County Department of Health Services.

Simply put, these figures mean that in terms of net natural growth, the Non-Hispanic White population is in a state of equilibrium, i.e., births equal deaths. However, among the major minorities a quite opposite condition prevails. Vital records disclose that for each Hispanic death there are ten births, for Asians almost six (5 3/4) births and Blacks almost three (2 2/3).

The other major growth element, migration (the difference between those moving in over those moving out), accounted for an estimated 117,000 new residents or slightly less than 20% of the County's gain since the 1980 Census.

Sources: *1850, 1890, 1910, 1920, 1960 and 1970 Decennial Censuses, U. S. Bureau of the Census; 1876 and 1883, Research Department, Los Angeles (Area) Chamber of Commerce; 1921 and 1928, California Taxpayers Association; 1942, 1949, 1956 and 1986, Los Angeles County Department of Regional Planning.

The County's experience is in marked contrast to that of the state. The California Department of Finance estimates that in the period from July 1980 to July 1985, California's population increased 2,264,000 with 53% of the gain a consequence of net migration and 47% net natural increase.

During 1985, no substantial changes in the post 1980 pattern of growth were evident. Population increases in the Central Core, San Gabriel Valley, San Fernando Valley, Santa Clarita Valley and Antelope Valley accounted for almost three-quarters of the countywide gain.

Population in the 175 square mile Central Core rose from a 1980 count of 1,926,000 to a January 1986 figure of 2,122,000, a gain of 196,000 or 10.2%. Centered upon Downtown Los Angeles, this area includes such communities and cities as Hollywood, Wilshire District, Crenshaw, South Central, East Los Angeles, El Sereno, Lincoln Heights, Culver City, South Gate, Huntington Park and Montebello.

Significant gains also were noted in both the San Gabriel and San Fernando Valleys. The population in the San Gabriel Valley increased from 1,378,000 in 1980 to 1,516,000, an increase of 138,000, or 10.0%, while the number living in the San Fernando Valley rose from 1,122,000 to 1,178,000, a gain of 57,000 or 5.1%

Growth in North County shows no evidence of slackening. Continuing to rise, Santa Clarita Valley's population reached 106,000 on January first. This new total represents a gain of 27,000 or 34.2% since 1980. During these same years, comparable gains were recorded in the Antelope Valley, where, at the beginning of the year, the population totaled 131,500. This is an increase of 25.3% or 26,500 more persons than were in the Valley at the beginning of the decade.

The population of the County's 84 cities totaled 7,045,600, while unincorporated area residents totaled 1,029,000. The County, for the first time now, has seven cities with a population in excess of 100,000. These are: Los Angeles 3,188,700, Long Beach 381,200, Glendale 148,700, Torrance 131,400, Pasadena 128,500, Pomona 110,100 and Inglewood 101,000.

POPULATION TREND ADJUSTED

The United States Bureau of the Census recently announced a modification to their methodology for estimating the population of California. Recognizing that undocumented aliens contribute to the state's population growth, the Bureau is adding approximately 50,000 annually to their post 1980 estimates for California.

In order to accommodate this Bureau adjustment and to maintain a reasonable alignment with their California estimates, a proportionate share of this increase has been added to this issue's countywide totals and where appropriate, to the population estimates of certain Statistical Areas.

This Bureau change will continue to be recognized in future issues, but no effort will be made to adjust earlier estimates to accommodate this issue's "lump sum" adjustment.

GROWTH IN HOUSING SUPPLY ACCELERATES

The net number of new housing units (new construction less demolitions and move outs) entering the inventory contined to accelerate during the second half of 1985 with 18,688 units added. This is 2,761 or 17.3% more than were added during the previous six months and 7,063 or 60.8% more than in the last half of 1984.

This latest net gain brings the County's housing supply up to an estimated January first total of 2,986,555 units. This new figure represents a net increase of 133,125 or 4.7% since the 1980 Census.

Last year witnessed a step up in the current resurgence in single family construction. During 1985, 11,031 singles were added. This was 4,814 or 77.5% more than the 6,213 in 1984.

However, residential developers continue to favor apartment construction. For example, in the six years of this decade, multiples have accounted for 73.5% of the net unit increase. Even last year, and in spite of the sharp increase in single family construction, 68% or 23,510 of the 34,615 units added were multiples.

POPULATION AND HOUSING NOTES

ADJUSTMENTS

1. A major brush fire on the afternoon of July 2, 1985 destroyed 53 single family units in the Baldwin Hills section of Los Angeles City. These units have been deducted from the housing inventory of Census Tract 2364.00 and Statistical Area 1.14 (Crenshaw District).
2. Through the cooperation of their respective building officials, several gaps in the residential construction records of Pico Rivera and Santa Monica were closed. The January first housing unit totals for S.A. 34.4 and S.A. 30.1 reflect the addition of these missing permits.

ANNEXATIONS AND DETACHMENTS

1. Gardena (S.A. 16.1) annexed 38 single units from S.A. 16.612 (East Alondra Park).
2. Glendora (S.A. 7.4) annexed 90 single units with 75 taken from S.A. 7.511 (East Azusa Islands) and 15 from S.A. 7.512 (Glendora Islands).
3. A detachment agreement between the cities of Los Angeles and Hidden Hills which adjusted their common boundary required the transfer of 7 single units from S.A. 6.12 (Woodland Hills) to S.A. 5.2 (Hidden Hills). The boundary between Major Statistical Areas 5.0, Calabasas Area, and 6.0, Chatsworth-West Valley Area, was adjusted accordingly.
